

# Double Top Trader

## Turn your spare time into spare cash

"This has to be the best spread betting system ever to hit the market"

"Over £3800 made trading the Footsie 100 in January alone"

I give this system the thumbs up give it a try I rate this  
10 out of 10 excellent".

"Excellent information with your excellent support  
I just started trading and making steady profits from day one"

**Seriously, if I can do it, anyone can. Let me  
show you how – risk free!**

Dear Friend,

I used to get so tired of drip feeding my trading account, trying the latest greatest methods on the market from the newest trading guru on the scene. Basically these so called experts know no more than me. Things had to change and soon. Having read many books on the subject, attended more than enough seminars and bought endless

systems wasting £1000's, I was sure I had enough knowledge to formulate my own spread betting strategy and put these so called experts to shame.

**Now I have discovered a method that ANYONE with no of experience of trading at all can use that made over £3800 in a month TAX FREE from their PC at home ( that's to the minimum £2 per trade ) trading in just one market. With experience I would expect you to be making multiple trades in various markets from indices to popular shares and commodities exceeding that figure effortlessly.**

All my previous attempts to make money on the markets failed why? I was playing in the wrong type of markets. Forex markets are volatile and not for the faint hearted. Small banks big stakes were another reason I failed, plus weak strategies and no money management. I have now finally put all of that behind me The most volatile market I consider trading in these days is the FTSE 100 Rolling daily ( footsie 100 ) a pussycat compared to the Currency markets and one amongst many that I feel I have now tamed.

Probably the most straightforward and sensible method I have ever bought I have had many profitable trades since. I am very pleased I purchased it and many thanks for sharing this brilliant method with me for such a low price, I now trade in the same markets as the big boys and am very confident when I trade the profits will keep rolling in.

## **Now you might think that spread betting is something that only other people do.**

That's EXACTLY what I used to think!

**This is a system ordinary people like you and I can use to profit from every day.**

Consider this - with my proven system:

- **You can be up and running within an hour**
- **All you need is an Internet connection and a PC**
- **You can start with as little as £30 in your trading bank**
- **You can trade part-time or full-time or even after work**
- **Long term trades can be placed and checked only once per day**
- **I'll be there to personally mentor you until you become successful! I'll even show you the exact trades that were available each day.**

Now before I show you exactly how this works, let me make one thing clear:

**This won't make you a millionaire overnight, but it could give you the kind of money that will make a huge difference to your life!**

This is not a fly-by-night get rich quick scheme. Like you, I'm sick of all the big promises and wasted money! If you're after that sort of thing please look elsewhere.

But... if you're the kind of person who'd like to earn a realistic side income part-time - without the usual risks associated with spread betting, this could be perfect for you.

**You just sit at your PC, spot the simple signal,  
place your trade and that's it!**

**With practice you will be scouring the market for  
opportunities to place multiple trades**

**If you haven't the time to trade through the day you can  
use this strategy to make money while you are out at  
work or even while you sleep. This information is all  
explained clearly in my manual**

I'm an ordinary working class man from Yorkshire. I wasn't born with a silver spoon in my mouth and I didn't go to some private school or work in the City. But you know what they say about us Yorkshire men were very shrewd when it comes to investing our money.

Just think, with practice you could be looking at no more commutes to the office. No more long hours or worries about recession or losing your job. Now I can spend more time with my family and actually afford the things I always dreamed of.

You see, with my strategy you can dip in and out whenever you feel like it...

Just a few hours in the day could make you a part-time income I cannot put an amount on this in sterling as it all depends on how much you are comfortable trading with, I am not going to be irresponsible and quote ridiculous figures. Once you get into using this method I do believe that as your bank increases so will your confidence and the amount you stake. It would be possible to make a nice little income in the morning session leaving you with the rest of the day free to spend as you please or simply trade 5 full days and treat this as a full time occupation and increase the amount of money flowing into your bank account. Or trade around your other commitments. Either full time or part time profits are there for the taking.

**Look how the system performed in some of the popular share markets chosen at random throughout January**

<b>January 2009</b>	<b>Full Time Profit (8:00 – 4.30pm ) ( at £2 a point )</b>	<b>Full Time Profit (8:00 – 4.30pm) (at £5 a point)</b>	<b>Full Time Profit (8:00 – 4.30pm) (at £10 a point)</b>
Alliance Trust Rolling Daily	£234	£585	£1170
BAE Systems Rolling Daily	£274	£685	£1370

Compass Rolling Daily	£324	£810	£1620
Drax Group Rolling Daily	£412	£1030	£2060
Eurasion Natural Resources	£626	£1565	£2130
Firstgroup Rolling Daily	£306	£765	£1530
<b>Total</b>	<b>£2176</b>	<b>£5440</b>	<b>£10880</b>
<b>Trading Days</b>	<b>22</b>	<b>22</b>	<b>22</b>
<b>Av. Daily Profit</b>	<b>£99</b>	<b>£247</b>	<b>£495</b>

Take a look at those figures again.

Even trading with £2 stakes, you could have made £2176 tax free in one month. That's not including the returns made from the footsie 100 another £3800

With practice I would expect you to be placing multiple trades on many of the markets shown above and to be trading to at least £5 per point within weeks not months as this strategy is so simple to use.

If you annualise that over 12 months at the same return that would be £26,000 to just £2 per point If you were in a normal job you'd have to earn over £40,000 before tax!

Of course, you may want to start with smaller stakes to begin with - say £1 at least until your confidence grows, but you can still see the potential. Then you can increase your stakes slowly and start making serious life-changing money . . .

And if you decide to trade full time, what could you expect to make?

**Well based on the documented figures, you would make well over £100,000 tax-free at £10 a point.**

And yes, my system could have made you this kind of money even while the global financial crisis was wiping trillions from the stock market.

Let me make another important point: of course not all the trades win. But with a strike rate of around 80% combined with strict risk-management any losses are limited. All the figures above include those occasional losing trades.

**This system is so easy to learn and use!**

All you need is access to a computer with broadband connection to spot the signals - and there's virtually no 'thinking' or problem solving involved.

"I cannot envisage the fact that I would be trading and making money immediately".

Why?

Because the signals when to get in on a trade are so clear .I've stripped away all the emotion usually associated with trading to remove the 'human psychological factor'.

My trading programme - contains everything you need to start making money spread betting the FTSE 100 index and all popular share markets plus commodities.

My strategy is so simple you should be up and running in an hour or less. I've made the system really easy to understand, but if there's anything that you feel doesn't make sense I'm there to help. I'll give you my private email address so that I can help give you guidance and feedback.

What's more, you can try my system risk free if you buy the system and prove to me that it has not made a profit in the first month of operation I'll refund you in full!

## **Because I've discovered a fast and simple trading strategy that really works for ordinary folk like you and me**

- It's not difficult, maths-based or technical
- It doesn't require any previous trading experience whatsoever
- If you have a PC with Internet access you can be up and running in as little as an hour!

I'd been looking for a home business opportunity for years.

I bought a load of financial trading strategies attended seminars read lots of different approaches to trading and I simply found them too confusing.

Maybe you've had similar experiences. If so, you'll know just how frustrating it can be...

Most other systems I have tried were either too simple and had no substance or too complex, too much hard work, or just didn't work and lost me money!

Sound familiar?

That's why I decided to figure it out myself.

## **So what makes my system different?**

The answer lies in its simplicity...

Because all you have to do is look out for just TWO specific signals to appear.

And that can happen many times a day, if my other back up indicators agree we have a solid trade

**Each time it does you could easily bank very generous profits indeed**

Just look for the signals and hit the trade. That's it

## **And now I want to help you make the same kind of returns from your own PC!**

I'd tried spread betting systems in the past but half the time I could never get my head around what those trading 'gurus' were going on about...

I like things to be clear and simple.

And that's why if you're anything like me you'll love my system.

The funny thing is, most traders wouldn't even bother with this. They like to overcomplicate things, with their flashy charts sequences and fancy software.

"To have spotted this phenomenon must have taken endless hours of studying charts and indicators, thank you for passing this incredible information on for an absolute steal of a price"

### **You choose when you want to trade**

You can trade as little or as much as you want and at times that suit you...

This can be 3-4 hours a day or it could be 8 hours a day for maximum profits.

And if you are new to trading don't worry, I'll be with you every step of the way.

FREE access will be given to my trading forum at [www.bettingsystem.info](http://www.bettingsystem.info) apart from FREE daily advices on I will discuss the previous day's trades and how they went. That way you can check your trades against mine.

**Fancy a new car... exotic holidays - that all sounded great to me! Why shouldn't you have them too?**

"...thank you very much for sharing your system best purchase I made all year."

But more important than that, we get to have fun! We regularly eat out at nice restaurants and plan the kind of holidays that were once a pipe dream.

And you know what the funny thing is? Even though we can afford the little extras these days...

And don't worry if you have never used spread betting before. The truth is it's actually incredibly easy to understand.

It comes down to predicting one of two outcomes:

1) Either the stock market will go up.

Or

2) The stock market will go down.

Based upon my carefully analysed simple signals, you could be in and out and take a small profit each time. I'll show you step-by-step how to set up your spread betting account and test the system with a demo account so you don't risk any real money at all.

(Believe me you'll laugh to yourself when you learn how easy it is).

The trick is to know when and where to trade - and that's where I come in.

**You will be making regular daily profits. Once you get the hang of it you'll be hooked!**

I just couldn't believe that it kept working, time and time again. I wanted to keep bagging those winners.

But don't let the simplicity of my system put you off, this is a PROVEN strategy that's been tested over and over again.

And it's not just me who's been banking these easy gains.

"I've spent quite a few years and more than a few quid trying various systems, but none has lived up to my expectations... I wasn't even looking for spread-betting, but this could turn out to be the best move I ever made."

"I have to say so far your system appears to be a far superior system compared to anything to do with horses or any other form of sports betting."

"At last a system that has the potential to make the kind of money I've been hoping for".

If you can see just how profitable this is and want to claim your 30 day risk free trial. If you can prove to me that system does not work, I will give you a full refund

## **How did an ordinary wage slave discover a simple strategy?**

**The drive to succeed and become self sufficient plus hours and hours of work studying charts, believe me this method didn't just fall into my lap.**

I'd tried everything to supplement my 9-5 income in the past. Gambling systems, online business opportunities... you name it.

spread betting was something that had always interested me. But the systems I'd tried in the past had either been too complex or too risky.

But I knew there was a way to crack it...

I'd seen others do it and I knew what a goldmine it was for those who knew what they were doing. But I wanted a reliable method, not some fancy trend that works for a couple of weeks and then fizzles out.

And that's when it came to me...

All the trading methods I'd tried in the past were 'make or break' systems, trading in volatile markets.

That's all well and good if you've got the start up capital to begin with... but on my income I just couldn't afford to take big risks.

It was a combination of hard work and pure chance that gave me what I was looking for.

And I'll never forget the day when I had my first successful trades using this method

## **I pocketed an easy £300 in about 90 minutes!**

One evening I was looking at some simple charts when it hit me.

I spotted a trend within the charts of the FTSE 100 (the main stock market index that contains the UK's top 100 companies)... it was a VERY specific pattern that certain markets appeared to be following.

The more I tested my theory the more excited I got.

I almost felt stupid for not seeing it before – so I ran some back tests, paper traded my system and began using small stakes of my own money.

The first time I felt nervous as I hit the 'trade' button...

But after exactly 90 minutes £300 pinged into my account (yes that first time is etched onto my memory!)

But I wanted to make sure it wasn't a fluke, so I kept testing my strategy.

And it worked again... and again... and again.

## **One time I made over £500 in less than an hour!**

It's hard to describe the feeling - that adrenalin rush.

Signal after signal popped up one after the other.

“Just to let you know how simple and profitable this system has been for me... Never thought I'd ever find a system that actually works as advertised, but I think my search is over”.

And this isn't a 'once in a blue moon' occurrence! Sure you don't always get so many signals in such a short space of time...

## **Beware of the Cowboys...**

I'm going to be 100% upfront with you.

There are lots of 'questionable' trading strategies out there. Believe me I've seen and tested a lot of them. Some of the less honest individuals present you with cherry picked results behind a glossy smoke screen.

It makes me FURIOUS. These huge fairy tale sums would impress anyone. But they don't tell you about what happens when you hit a losing trade... and just how large a starting bank you'd need to make the kinds of gains they're shouting about.

Remember you can see a daily log of all my winning AND losing trades at [www.bettingsystem.info](http://www.bettingsystem.info) . You will be receiving a full breakdown of these at the end of each day

I am supremely confident that within a few short weeks, you will have enough confidence to raise your stakes. And that's when it gets' really interesting...

Once you're feeling comfortable using the system you can reinvest your winnings and start betting with £5 to £10 a point no problem.

That's when the gains become really impressive

## **So how does it work?**

I can't go into too much detail here. The system is based upon a factor that reoccurs on a daily basis in all markets. But remember what I stated earlier Volatile markets are hard to predict you need huge stop losses therefore incur huge losses. Now I don't want to be under so much pressure that when I am trading I have my finger on my mouse ready to click and bail out when the trade goes against me, and I certainly wouldn't want to put a product out in the market that would put anyone else in that kind of position

I have been there and done all of that, it's not pretty

In a nutshell you'll be spread betting on the FTSE 100 and selected popular shares.

The FTSE 100 moves pretty slow compared to Forex markets and share markets move even slower. You've seen the profit tables, there isn't a lot wrong with that kind of profit with so little stress.

For every point the market moves (it could be up or down) you profit from the amount of money you've staked multiplied by the number of points it's moved.

In other words if it moves 12 points on a £10 stake you make £120.

That might sound small fry, but remember we're looking to make several of these types of trade every, single day sometimes 10 times over and to much larger profits.

The really good news is that with £1 stakes, your starting bank can be as little as £200. That'll be more than enough to get you started - and of course once your bank grows you can increase your bank and enjoy even greater profits!

With your trade in place you don't have to do anything else. I'll show you how to put stop-losses in place so that you don't have to be glued to the seat every second of the day.

## **If this is making me so much money, why am I sharing it with you?**

Why not!

Letting others into my secret won't dent my profits in the slightest.

I want to prove to you that spread betting is something that ordinary people like you and I can make a very decent income from.

You don't need to be rich or knowledgeable about the markets to do this because my strategy works right out of the box. Follow my simple guide, learn how to spot the simple signals and that really is it.

"I trialled this system some months ago and can confirm that it's very accurate and consistent the author is an absolute genius! Everything you read makes perfect sense

Billions of pounds pass through the markets every single day. By showing you my technique I'm not going to rock the boat in the slightest.

Of course I'll make some money from selling you this strategy. But I think that's only fair considering the work I've had to put into it.

You'll easily be able to make that tiny investment back many times over.

**There's just one thing I need to make clear though...**

I can't guarantee this strategy will be available forever. I want to make sure that the strategy keeps making money. If at any point it looks like the number of those using it could affect the profitability I will close the doors.

I am sure you will understand that this is how I make my living using this strategy. Also, I want to make sure that those people who do join me in using it enjoy the same kind of profits.

**Trades are often over in less than one hour and you can trade as little or as often as you like**

That's what I love about this...

"Hi, just to say thanks a lot for your time and responses, you're a star, it's just what I needed. Your after sales advice is second to none. I really cannot thank you enough

It's not just the money, or the simplicity of the system, it's the freedom it gives you.

Because if you're happy to pluck £100 - £200 out of the markets you can stop and have the rest of the day to yourself!

Each trade can be over in approximately one hour. The money is not tied up anywhere - it's yours. At the click of a button you can deposit it straight into your bank account.

On the other hand, you can get really stuck in and make a few thousand pounds a week using this system!

There are no hard and fast rules.

I don't have to book a holiday off work... and I don't have to ask anyone's permission.

## **You don't need to take big risks to make good money from spread betting**

Of course the strategy doesn't always pick a winner.

There's no such thing as a 100% track record although this system does come pretty close.

Because since it was made available to other people to trial this system has delivered a massive 80% strike rate.

And on the occasions when we do have a losing trade, the downside is kept to an absolute minimum. That's because you set a stop loss of 20 points on each trade.

That means the maximum you ever stand to lose is £20 at £1 pound a point and £200 at £10 a point.

That might sound like a lot but with a current 80% strike rate winners far outweigh the losers by a long stretch.

## **What would this kind of tax-free income mean to you right now?**

I wake up everyday feeling excited. I don't get out of bed thinking: "Ugh I've got to go to work and sit in a grey office doing mundane tasks".

"I started to trade as advised using a demo account. Following the strategy to the letter I did make one or two initial errors but thanks for your advice clearing up my mistakes. After my initial blip I went on to make impressive sums in my demo account and have the confidence to do exactly the same for real, I can't wait "

This is something that works for ordinary people - not just financial whizz kids or number boffins. And yes, I have proved that it works in good times and bad for the stock market.

Just follow my SIMPLE instructions and you'll soon be making your first trade.

There's no waiting around for phonebook size manuals filled with waffle, confusing jargon and ridiculous charts. Order today and I'll send you the information via an email attachment so you can get stuck in right away.

Once you've received my instructions you could be up and running in less than an hour and seeing your first tax-free profits by the end of your first trading day!

I know how frustrating it can be waiting around when you're keen to get cracking on a new project. That's why I've made it as simple as possible.

## **And don't worry, I'm there at EVERY step if there's anything you need clarifying**

I will also give you access my personal email address.

You can then get in touch with any questions you might have, my system is that simple though, you may well not have any at all.

And just to be absolutely sure you're going to go on and make good profits I will send you your money back 100% guaranteed if you can prove to me this system does not work, In other words you risk nothing. You can paper trade the signals to begin with.

## **How much would you pay for a strategy that could make you serious amounts of money each month - tax-free?**

If you went out and bought a study course on spread betting you'd be looking at spending from £300 – £2,000.

Seminars with mentoring can cost £13,000 or more!

The problem is you've got to be sure going in that you'll make at least that from the knowledge you've gained to make it worthwhile!

Quite frankly who wants that sort of pressure?

I don't want there to be anything getting in the way of you just trying this which is why you can get your hands on my proven trading strategy for just £150.

My system works right away. You can be up and running in your first day

If you don't think it makes money, Explain why and you don't pay a single penny.

You've seen my track record and what other people have to say. If you're happy to reserve your copy just click on the **Order Now** link at the bottom of this page.

**“Can I firstly thank you for such a simple yet very, very clever trading strategy. I say simple because I have been looking at charts for a years and would never have thought that a method so simple could actually make money trade after trade. Absolutely brilliant!**

I don't think I can be any fairer than that especially when you consider what you get:

- My simple, easy to understand manual - which should take you no longer than an hour or two to read and understand. Now don't expect a massive manual that's

going to collect dust on your shelf. This strategy is easy to understand and there's no need to complicate things. Still, I walk you through everything from setting up your account to spotting the signals and making your trade. A daily digest of the days trading sent to you at the end of each day. This will help you understand which opportunities arose and gives us a chance to analyse the days activities.

- Access to my personal email address. You can contact me at any time and I'll get back to you as soon as I physically can (usually within 24 hours). I keep the numbers on my course low so I can maintain an excellent level of support.

## **Hurry, this offer won't be available for long!**

If this sounds like something you'd be interested in I urge you to act fast

I'm passionate about giving the highest level of support which means if I feel there are too many new members on board I will have to close down the offer.

My priority is to give you my full attention and I can only do that by keeping the numbers manageable.

I look forward to hearing from you soon.

Best Regards

Anthony Gibson

Stock market trading made easy

PS: Remember you've got nothing to lose! **If you can prove to me that after 30 days of trading this system has not made you a profit in the recommended markets.** I will send you a full refund. Plus I'll always be on hand to answer your questions just in case you need me.
